Metal-Foil Detection

Identify foil-lined "booster" objects as they enter the store.

Metal-Foil Detection identifies "boosters," foil-lined bags or clothing commonly used in Organized Retail Crime, when entering/exiting the store. When a "booster" is detected, an audible or visual alarm alerts store personnel. The optional Metal-Foil Detection card simply plugs into the compatible AMS9060 Controller, no external enclosure or wiring required. It features multiple custom alerts such as visual and audible alarms at the pedestal and a digital remote alarm, or triggering a relay that connects to another device such as a paging system. Unlike competitive offerings, Metal-Foil Detection does not require additional antennas to operate — optimizing retail floor space and preserving store aesthetics.

Retailer Values

// Protects merchandise from sophisticated shoplifters by identifying foil-lined bags or clothing as it enters or exits the store

// Easily plugs into compatible AMS9060 Controller for a system upgrade

// Requires no additional antennas to help provide optimal retail floor space for shopper traffic and merchandise displays

// Provides full directional alarm flexibility when used with traffic counting

Product Codes

ZPSP-7020-MFD
Metal-Foil Detection Kit

Product Compatibility

AMS9060 Controller

Declarations
EMC
47 CFR, Part 15
EN 300 330
EN 301 489
RSS-210

Safety
IEC 60950-1

CE This product is in conformity with RoHS II Directive 2011/65/EU and REACH Substances of Very High Concern as defined in Regulation (EC) No 1907/2006 and subsequent amendments to both.
