

DF series

New 2Easy Monitor Series

Compatibility, Refreshed Design, Enabling Future Extension

DJ9

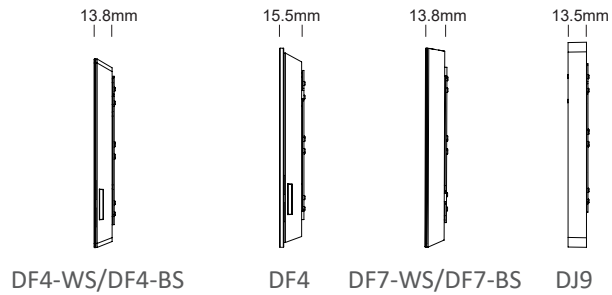

DF4

DF7

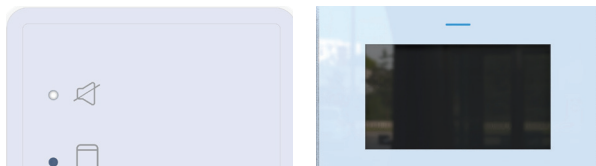

Ultra thin design

Slim design to fit into normal housing, provide a better installation and looking on the wall.

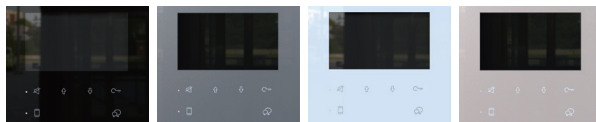

Optical glass surface

Compared to acrylic, optical glass surface provides clear view of image, easy clearance and prevent discoloration.

Different colors (*only customization)

LED color (customization)

Unified design

Unified design, for DF7,DF4,DJ9 fit to different needs and still harmonious in one building.

New 2easy series

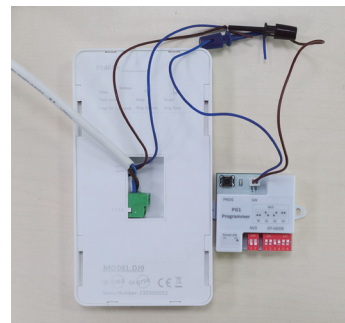

Compatible to 2easy door station, monitor and accessory*, easy for 2wire refurbishing and update.

**Accessory might need update, not support DT-IPG.*

New address settings

Address set via door station calling, and to avoid false setup, the address could be only configured within 2 min after power.

With PG1 accessory, address could be simply setting up by traditional ways through doorbell cable.

Customizable icons and logo

Customizable laser-printed key icons, text, and the logo, logo area has blue backlight.

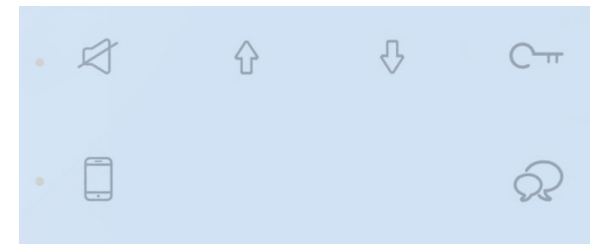

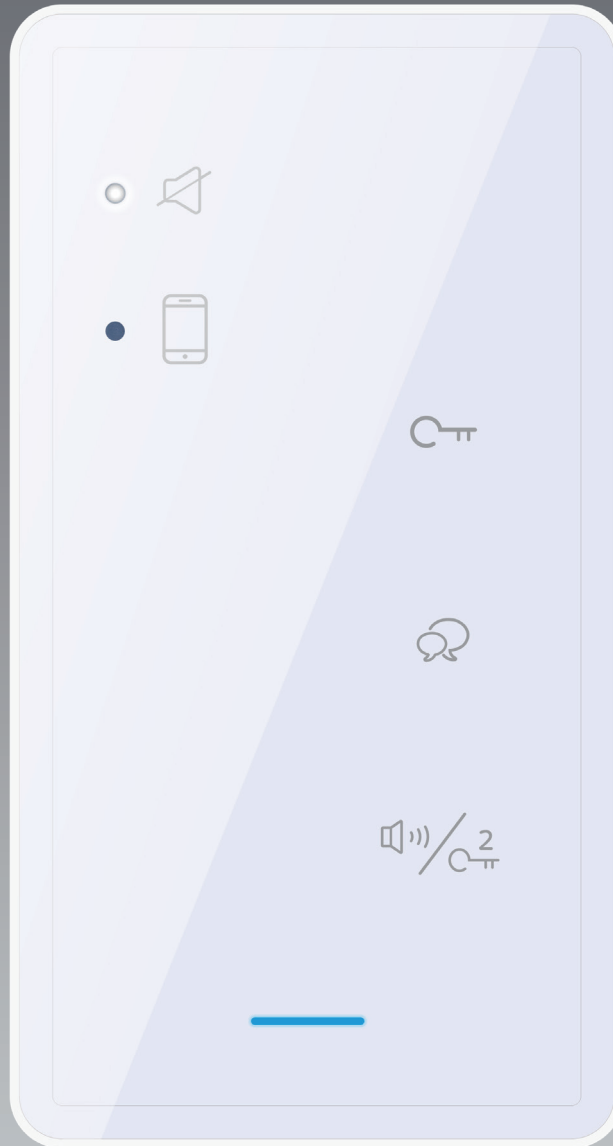

V-TEK

New intercom essence

Talk, unlock, mute and divert*, all icons you could find directly on new series.

* Divert is not available in current version, could be customized to other function.
